DECK LINE

BOW SECTION

Large bow section, with two separate bow compartments - anchor and bow lockers, provides an ample sunbathing area when connected to the console seat with sundeck spacious enough to comfortably fit 2 adults. Surrounded with the safety railing and ergonomic bow step plate, additionally covered with optional bow suntop, it creates a safe and shady spot for the kids to chill & play.

STEERING CONSOLE

Large steering console with a recessed deck inside provides a spacious storage compartment big enough to be used as a changing room and/or to install optional marine head(toilet). Supported by windshield and safety handrails the console has a legs' support platform in its base, a dashboard for up to 2x17' screens and traditionally for all Grand cruisers - a glove box.

DRIVER SEAT

Helm & passenger bolster seat has safety handrails, lifting cushions for leaning-to-seated transition and it boasts impressive width, ensuring the helmsman and passenger enjoy exceptional comfort. With its functional wet bar it comes with plenty of little lockers for storage and can optionally accommodate a 62 lit refrigerator-freezer and a sink & faucet set.

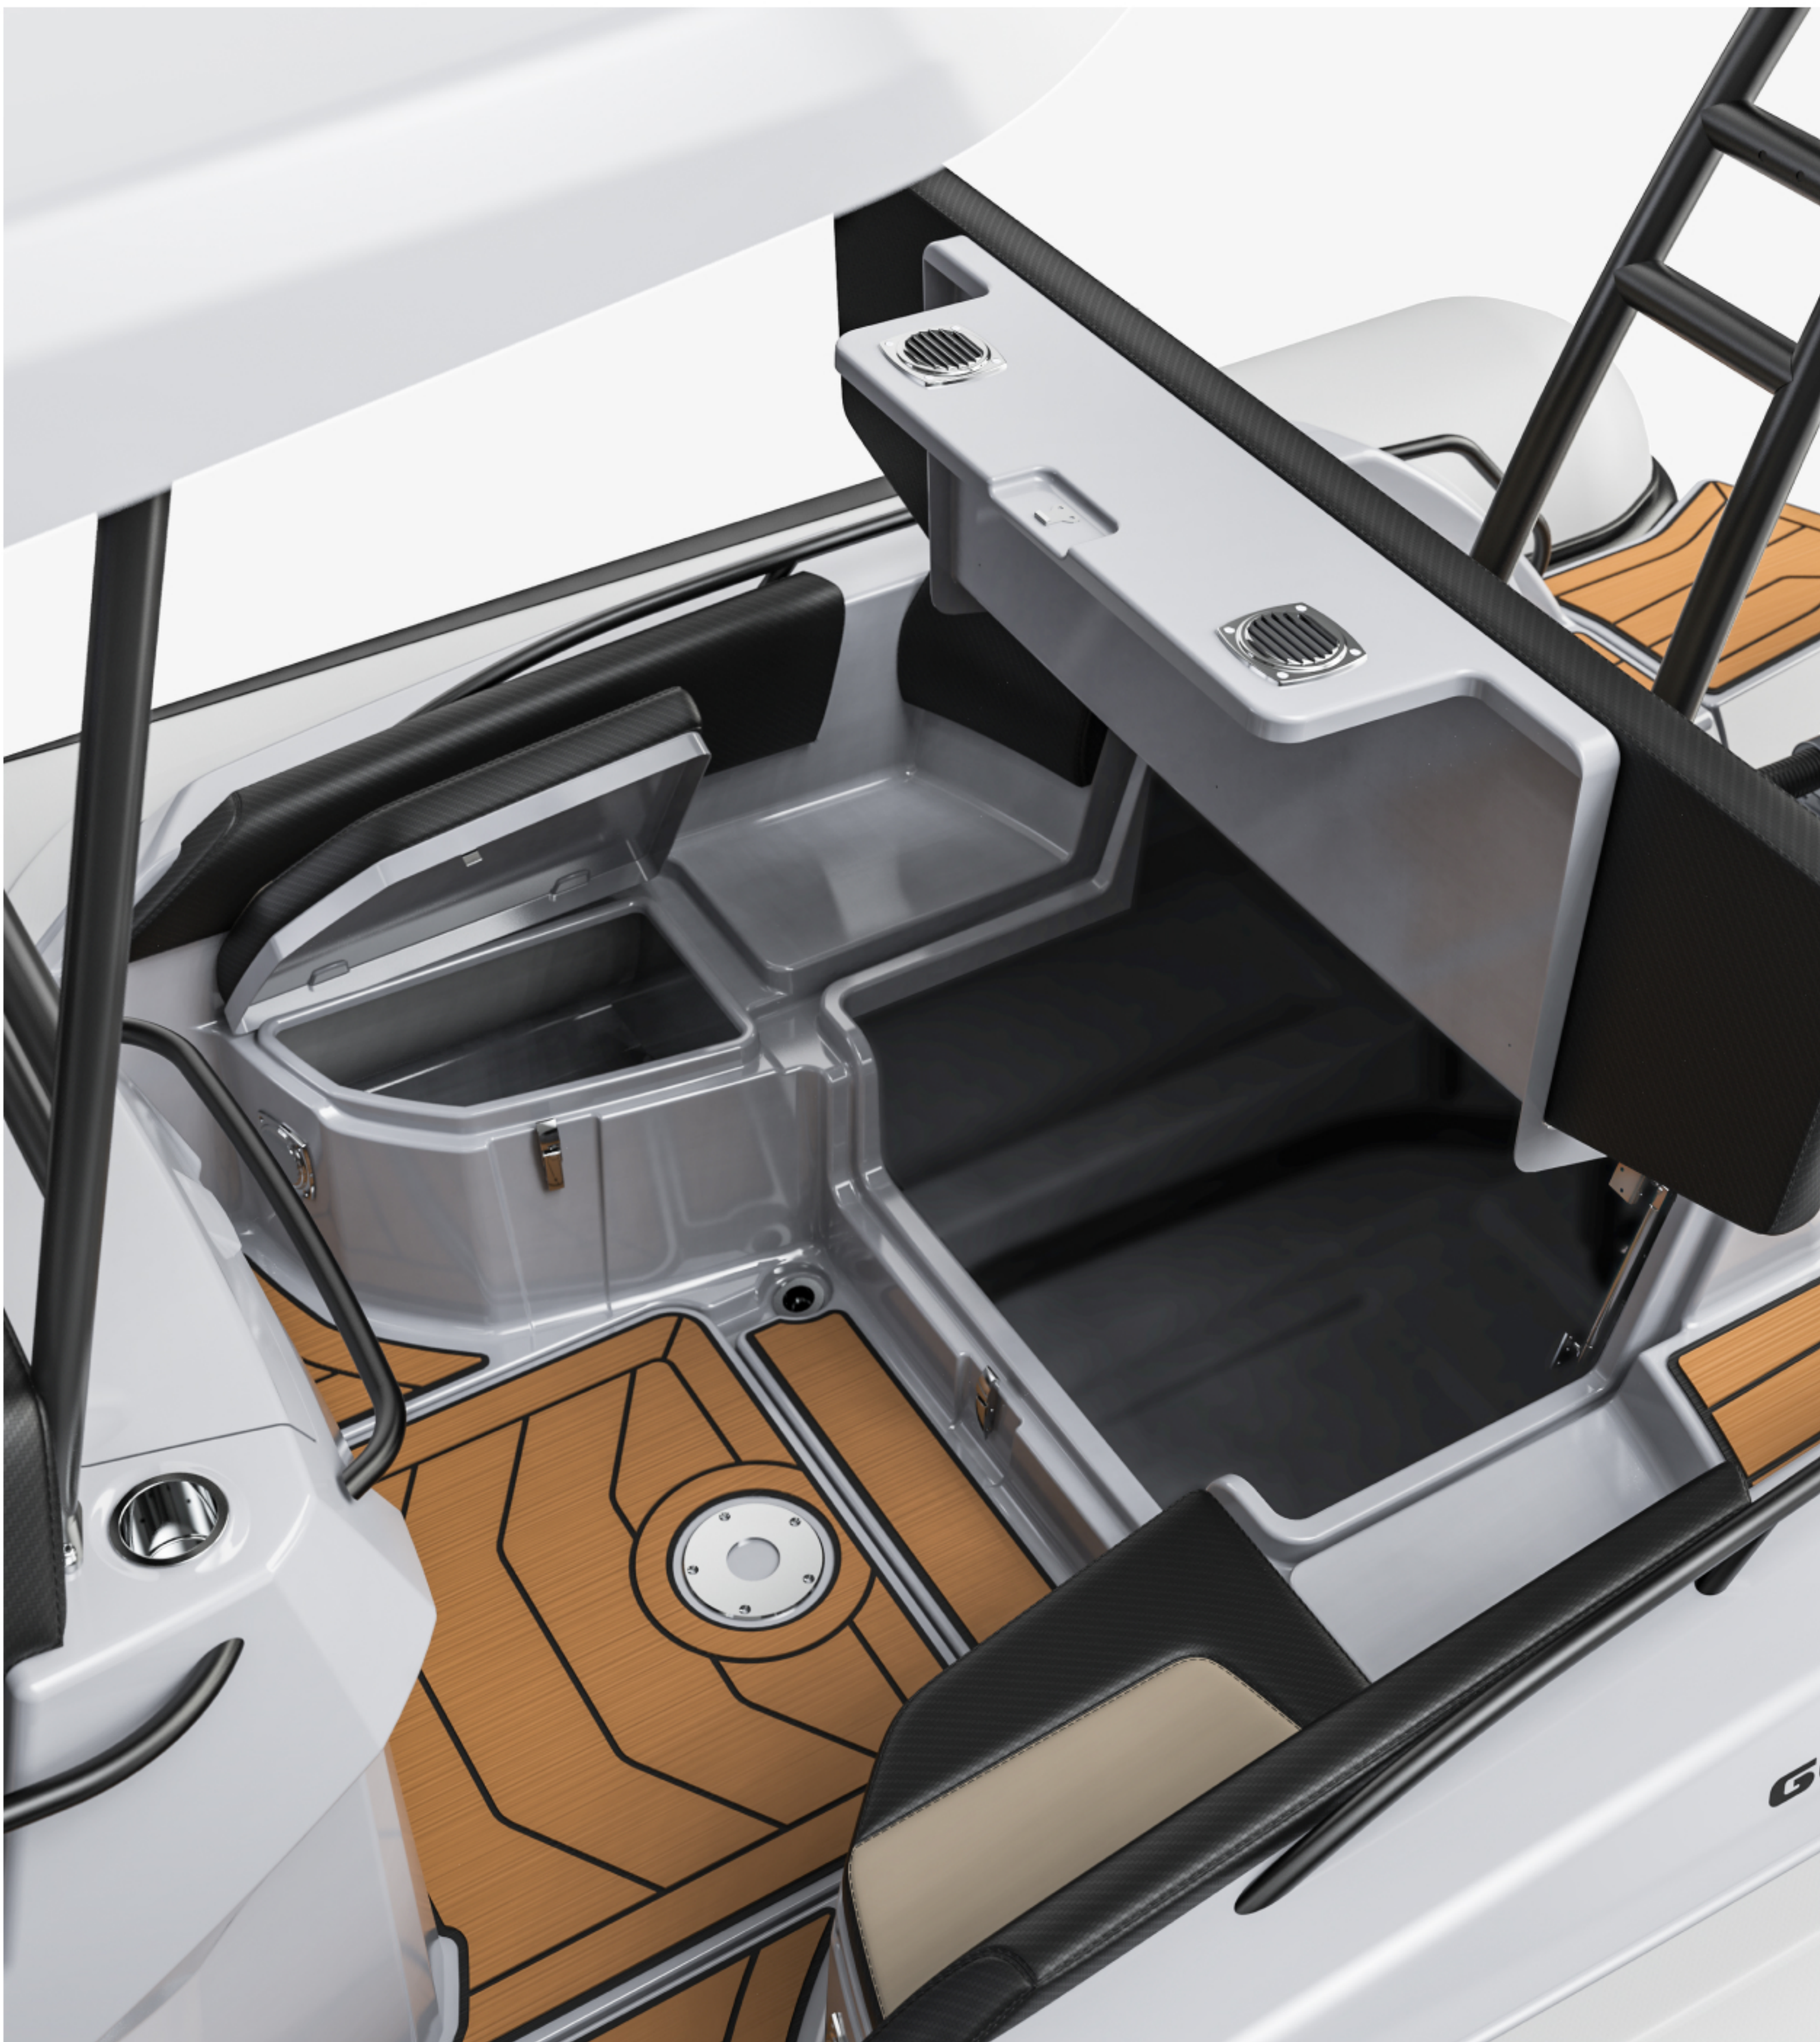

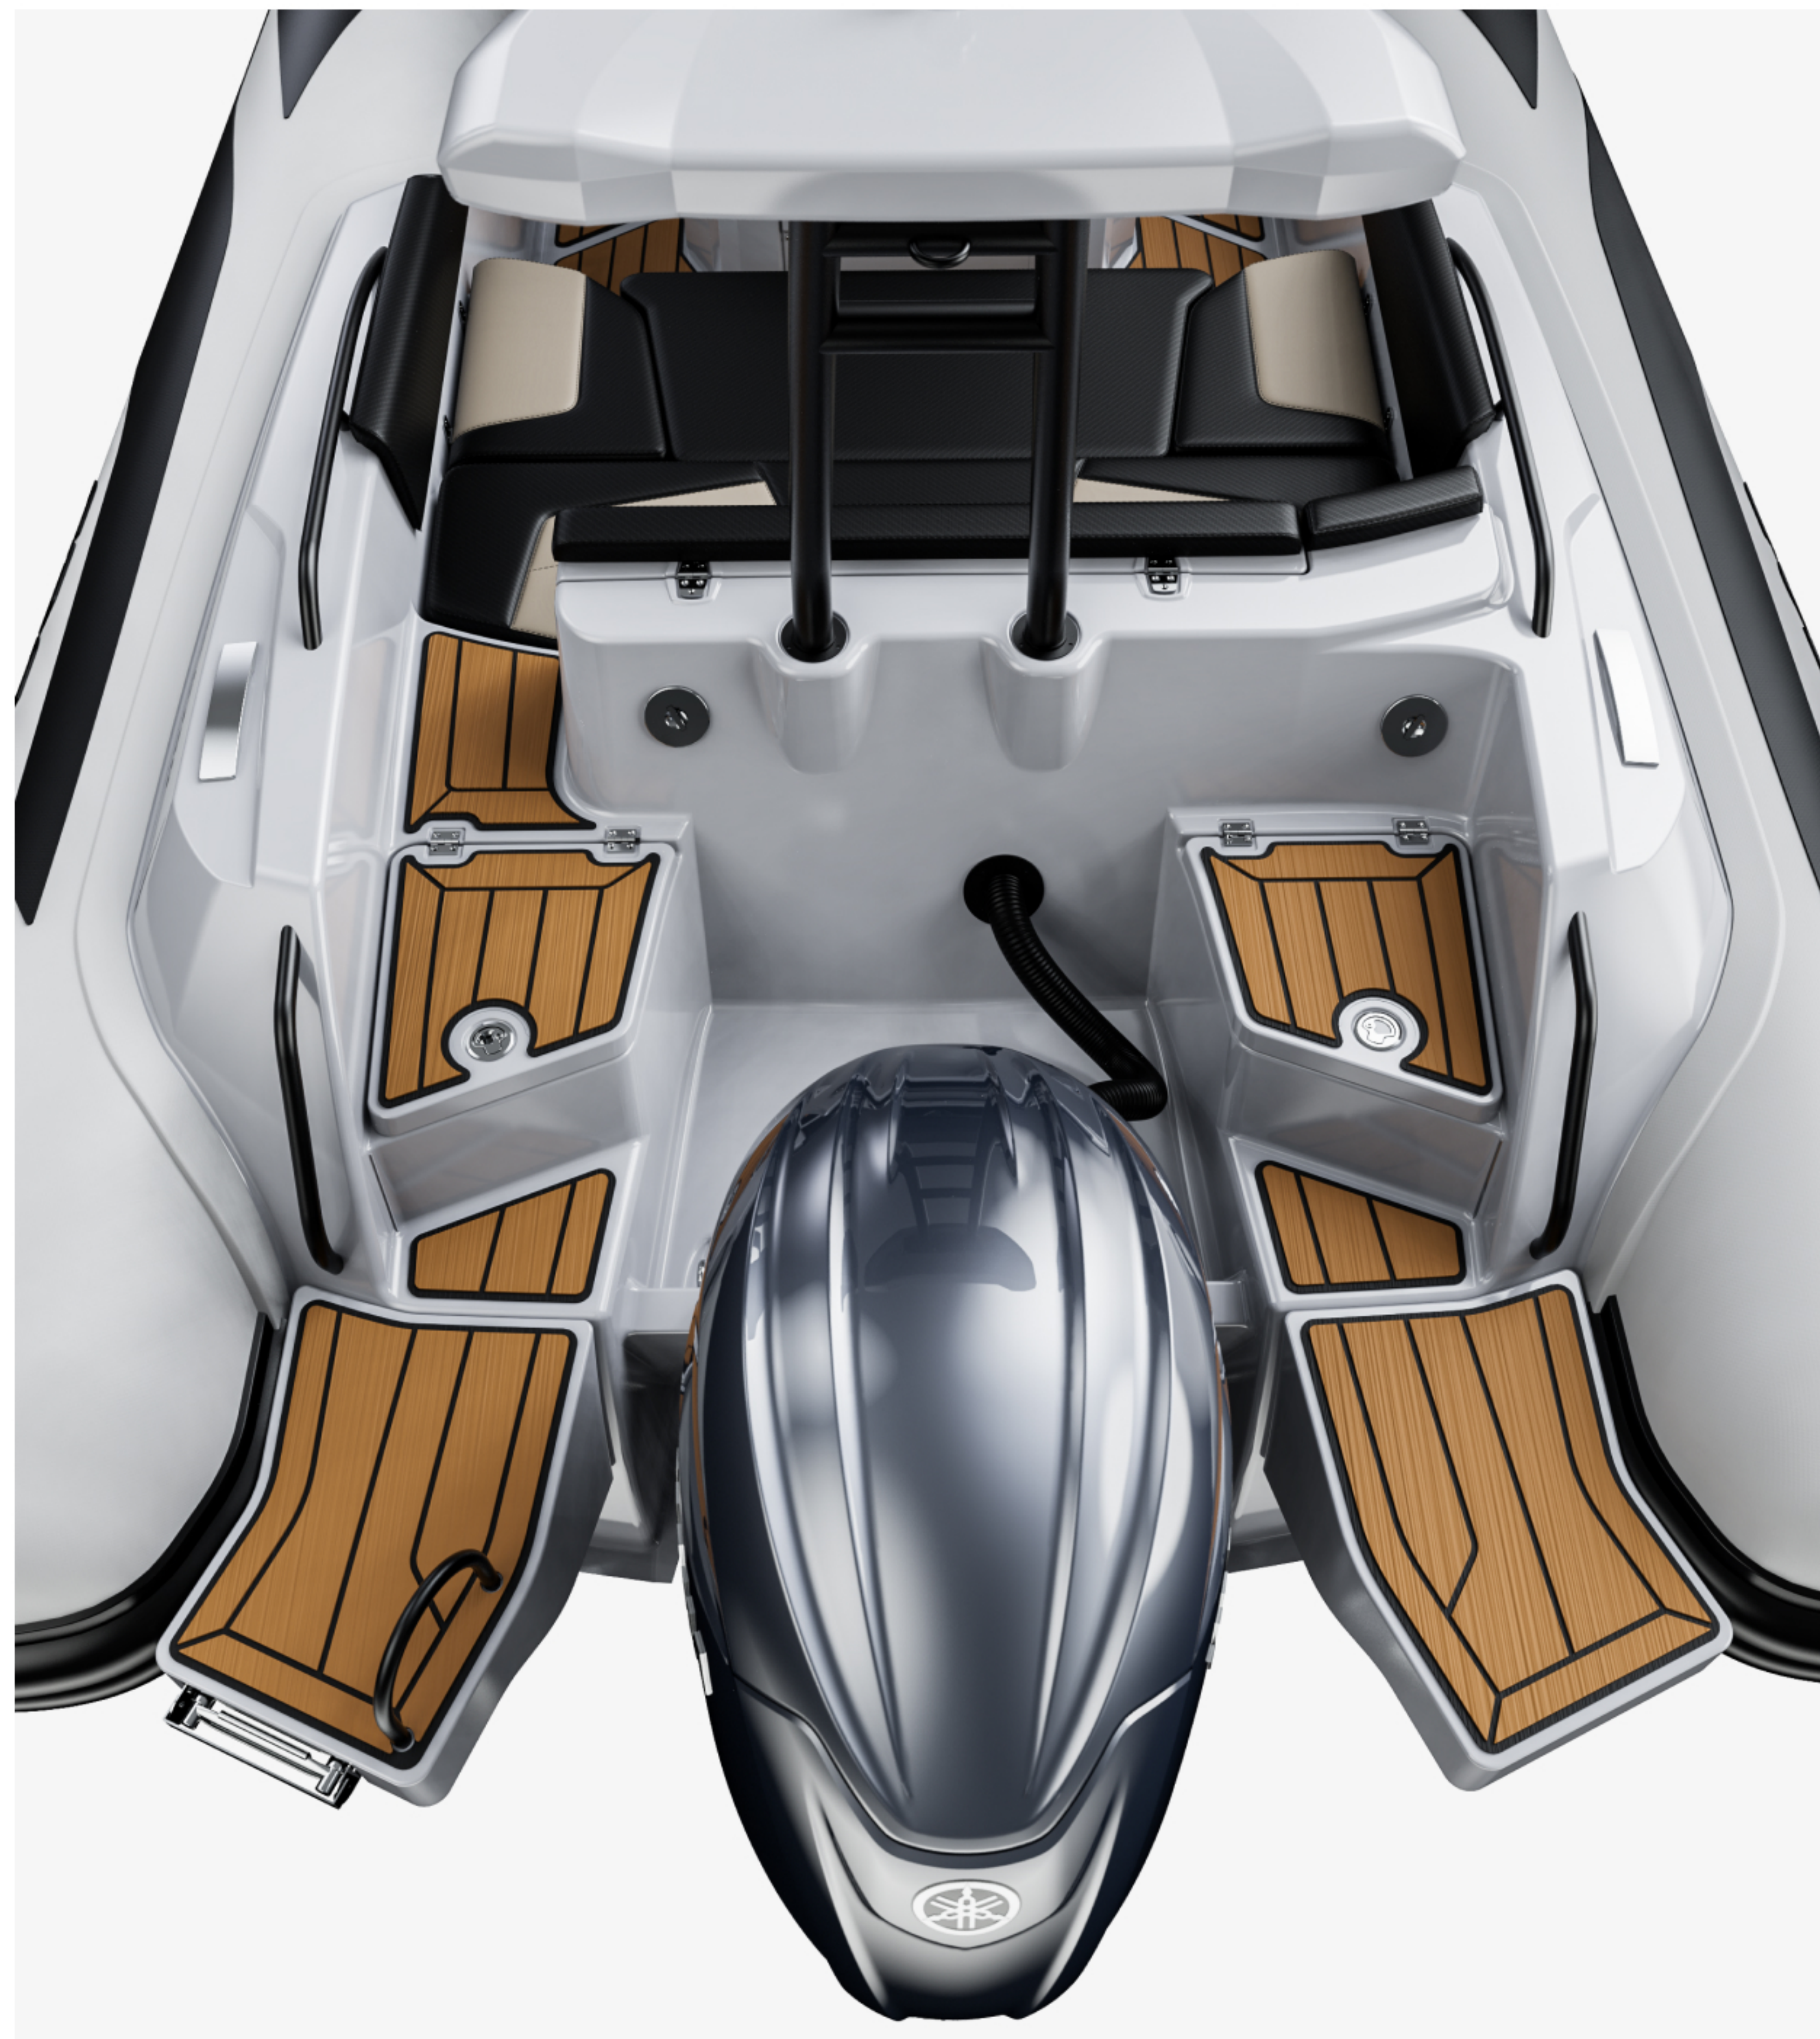

TABLE & SUNDECK

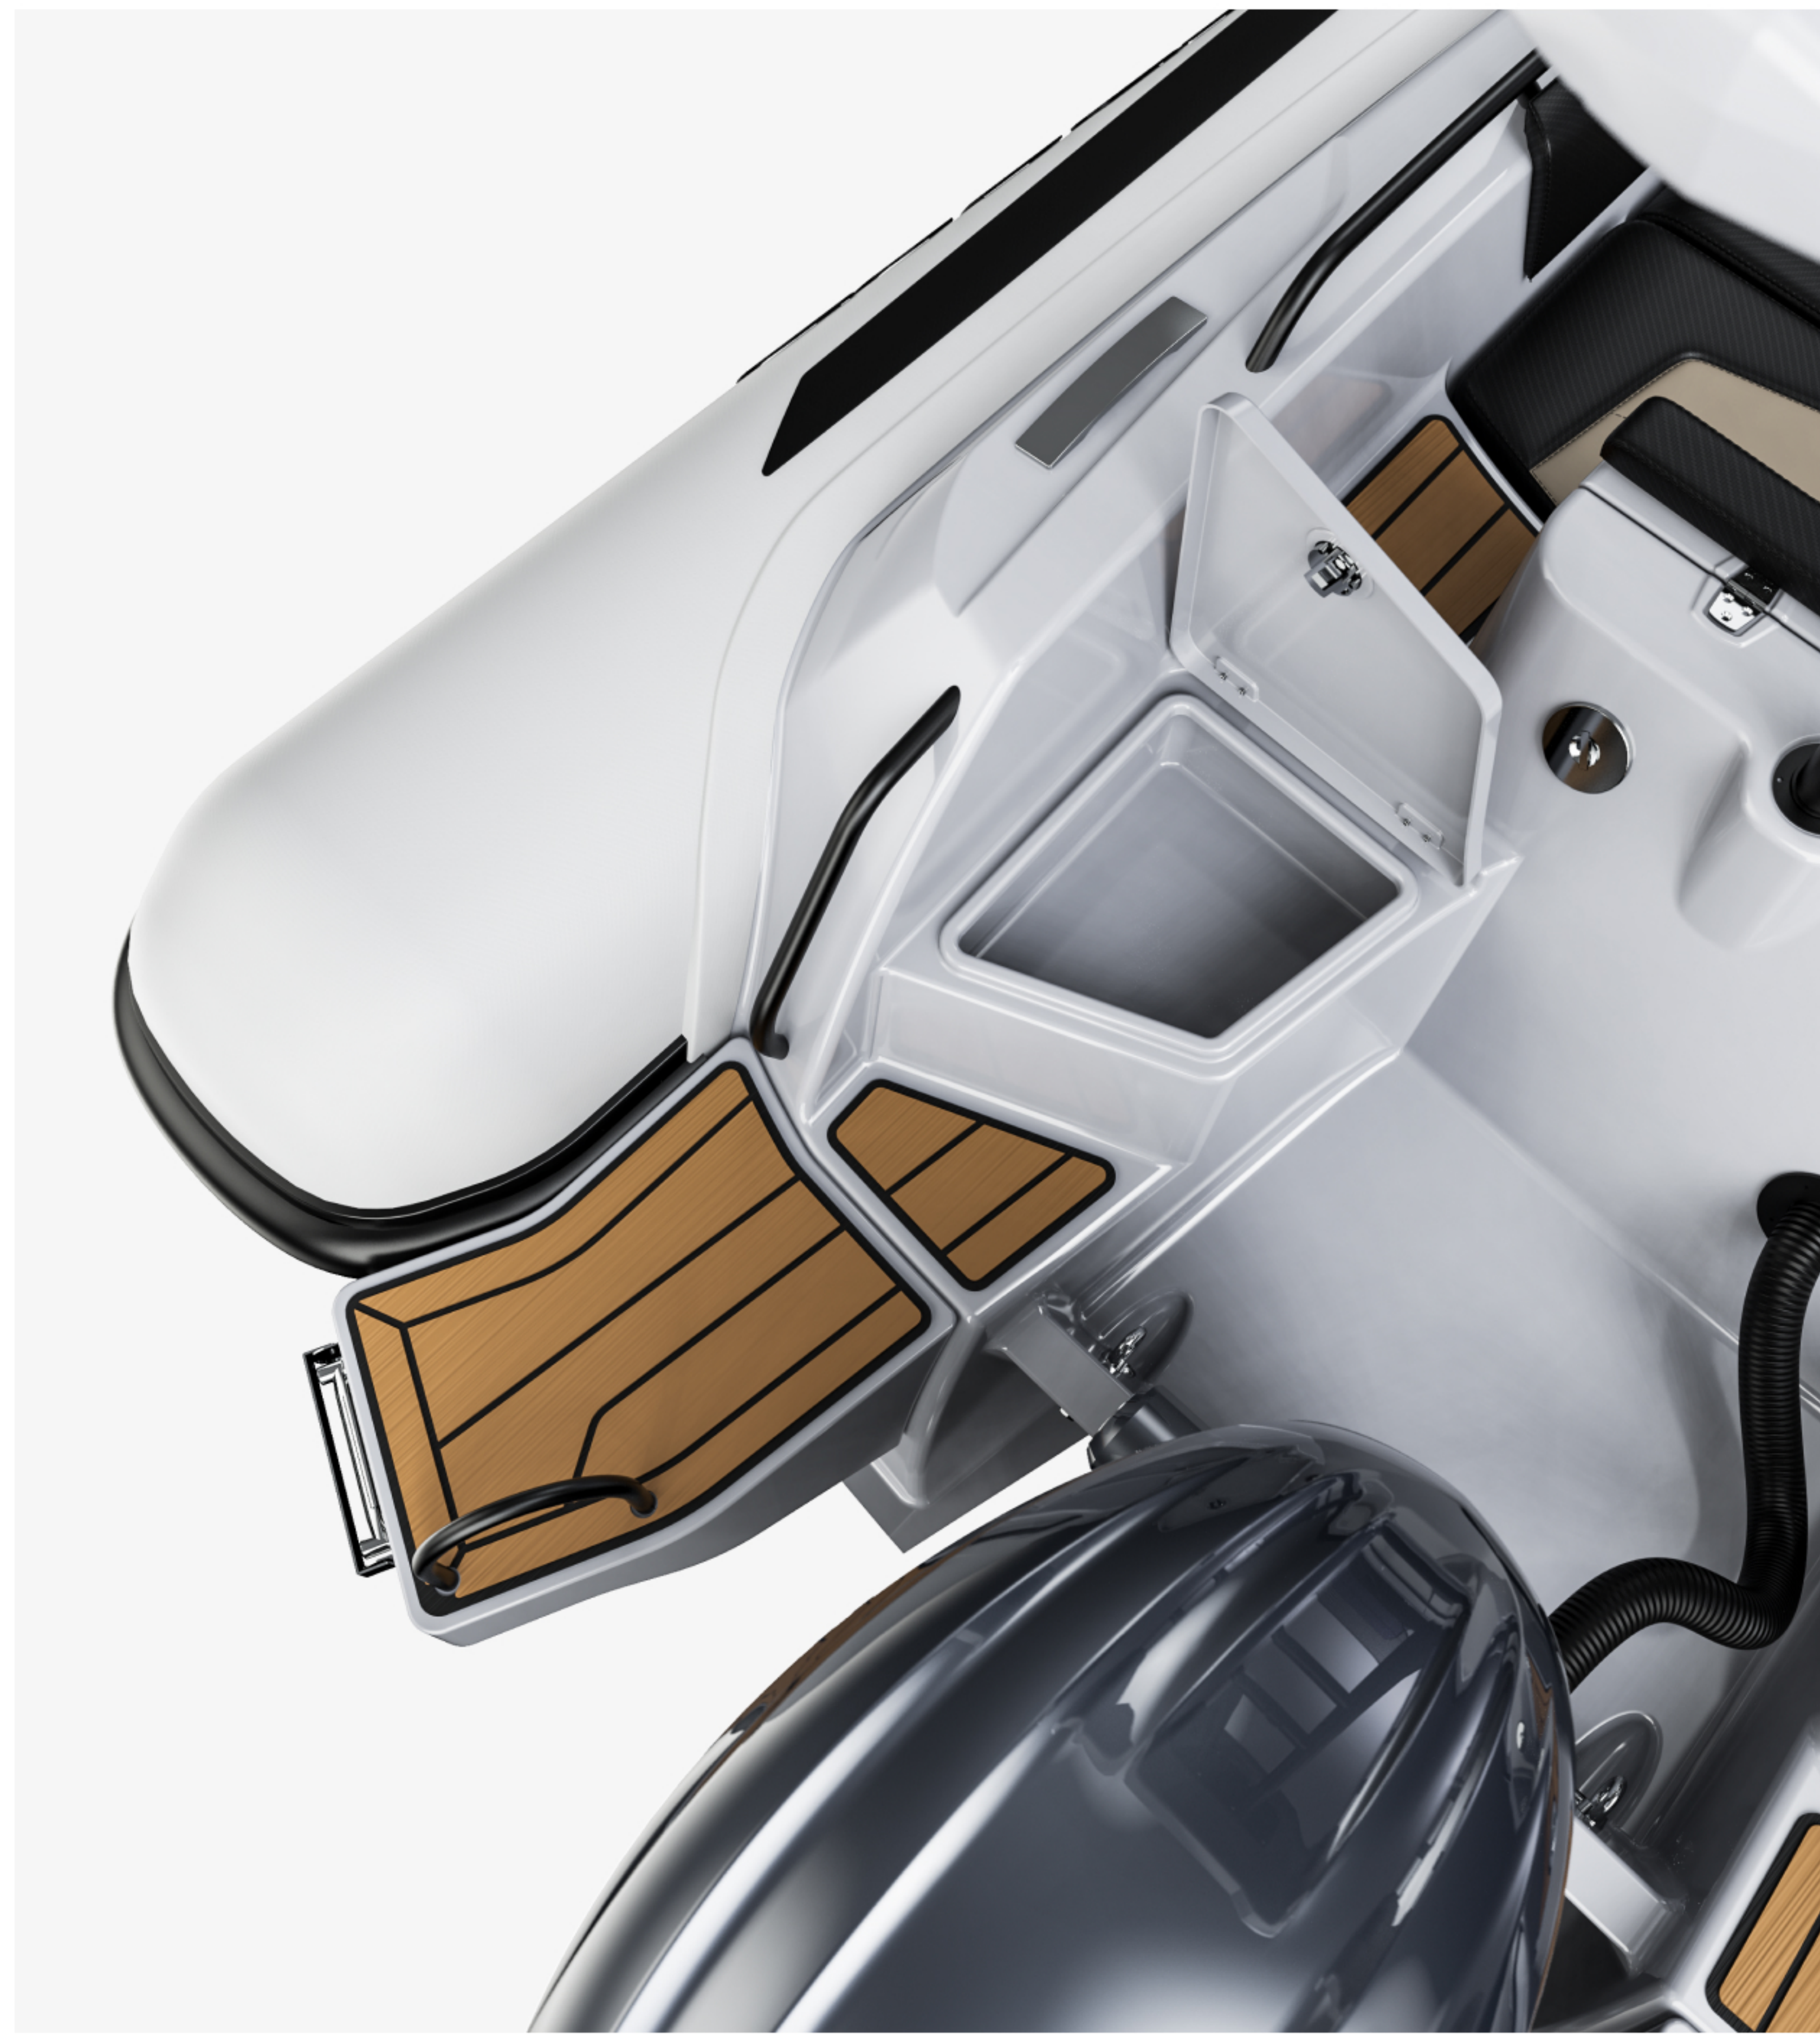

Classic U-shaped rear sofa with two side lockers and a generously sized middle storage compartment, all surrounded by safety handrails, it creates a cozy little area to have a chat or enjoy the view in peace. Completed with a removable sundeck it creates a huge bed for sunbathing or a dining spot when switched to table option with the fridge within hands reach.

REAR SECTION

Very special feature of an open(not obstructed) passage from the rear sofa to the recess area and its exceptionally broad stern offer additional large 'wet ropes' lockers. All together it creates a stairway right on the way inside/out that makes it a gradual, safe and convenient operation in the rear. Traditionally, rear swimming platforms feature a handrail and a ladder.

HARD TOP & SUNTOPS

Best used in a whole package, with the front and rear suntops that hide the entire boat in shade, this hard-top by itself perfectly shelters the driver and the passenger. It is 1.9m/6.2ft high, has integrated slots for speakers and is suitable for additional equipment installation such as radar.

BIMINI TOP

Coming as alternative to the hard-top, bimini fully covers the rear sofa area and partially shades the driver and his passenger. Has to be collapsed(closed) when the boat is on the move.
