BOW SECTION

Massive bow section boasts two separate compartments – anchor and bow lockers, offering a generous sunbathing space. It doesn't need any additional sundeck extensions as it already easily accommodates 2 adults. Supported by safety railings and a large & ergonomic bow step plate, it creates a secure environment and gradual entry.

STEERING CONSOLE

Huge steering console, featuring a recessed deck inside, offers a very generously-sized storage compartment/changing room with marine heads (toilet) installation option. Supported by windshield and safety handrails, the console includes a leg support platform at its base, a dashboard for fitting up to 2x16' screens, and, in line with the Grand cruisers tradition, a glove box for safety of your most precious belongings and documents.

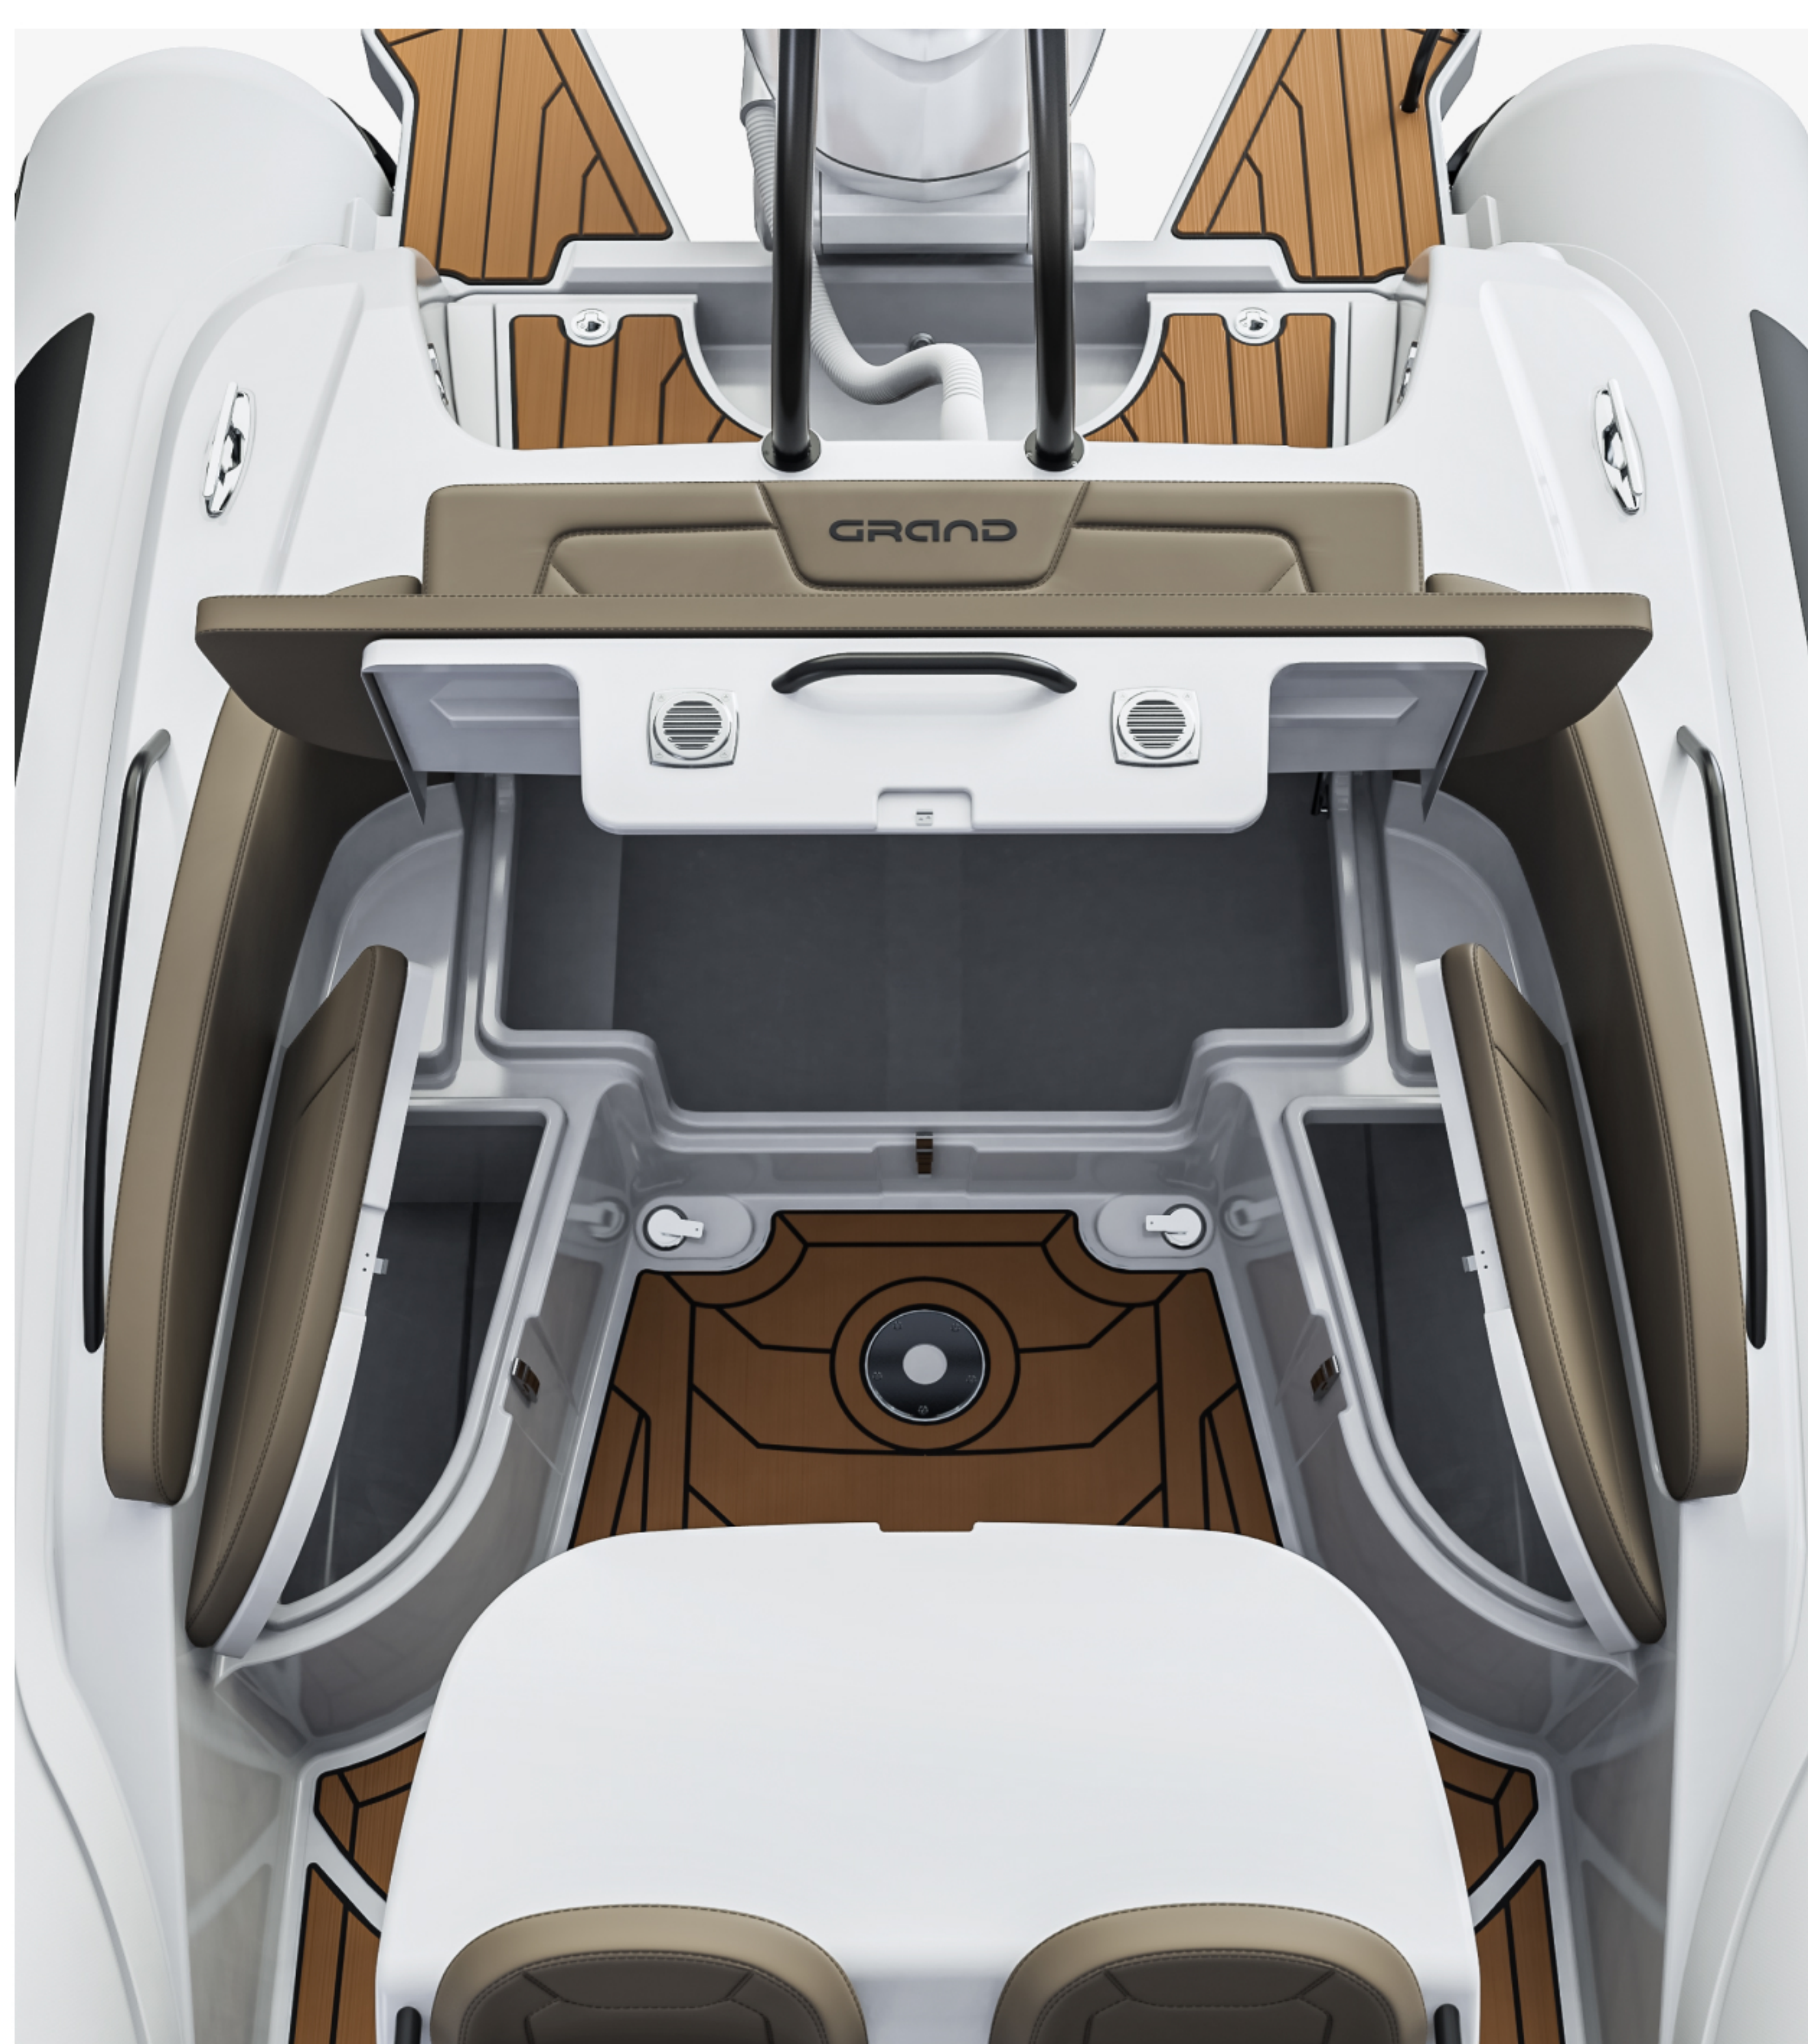

DRIVER SEAT

The helm and passenger bolster seat console comes with a practical wet bar, safety handrails, and lifting cushions for your smooth transition from leaning to seated positions. With its remarkable sizes, providing both the helmsman and passenger with exceptional comfort, it fits a full sized sink and 62-lit refrigerator-freezer, all while leaving enough space for cooking area.

TABLE & SUNDECKS

The classic U-shaped rear sofa, complete with two side lockers and a generously sized middle storage compartment, is traditionally surrounded by handrails for additional passengers' safety. Complemented by a rear removable table and fridge in seating console, it creates a comfortable dining zone that easily transforms into a spacious and delightful sunbathing area with a one-part sundeck extension.

REAR SECTION

Suitable for twin engine installation the rear adapts to your preferences – bigger platforms and lockers with one engine, and more compact platforms and lockers with two engines. Regardless what it is, this exceptionally broad stern is roomy enough for easy and comfortable movement. A stylish and ergonomic towing/navigation mast provides additional support during movement around and in the rear, and does not get in the way eliminating the need to crawl under it. Traditionally, swimming platforms come equipped with folding ladder and handrail.

HARD TOP

Giving a nice and cool shade the rigid hard-top is 1.9m/6.2ft high, has integrated slots for speakers and is suitable for additional equipment installation such as radar.

BIMINI TOP

Coming as alternative to the hard-top, bimini covers slightly bigger area and should be collapsed when the boat is on the move.
